

Consider Kickers

Problem: at the moment, in Showdown.php 2 or more players with the same hand do not produce the right winner. It simply returns the first one in the array.

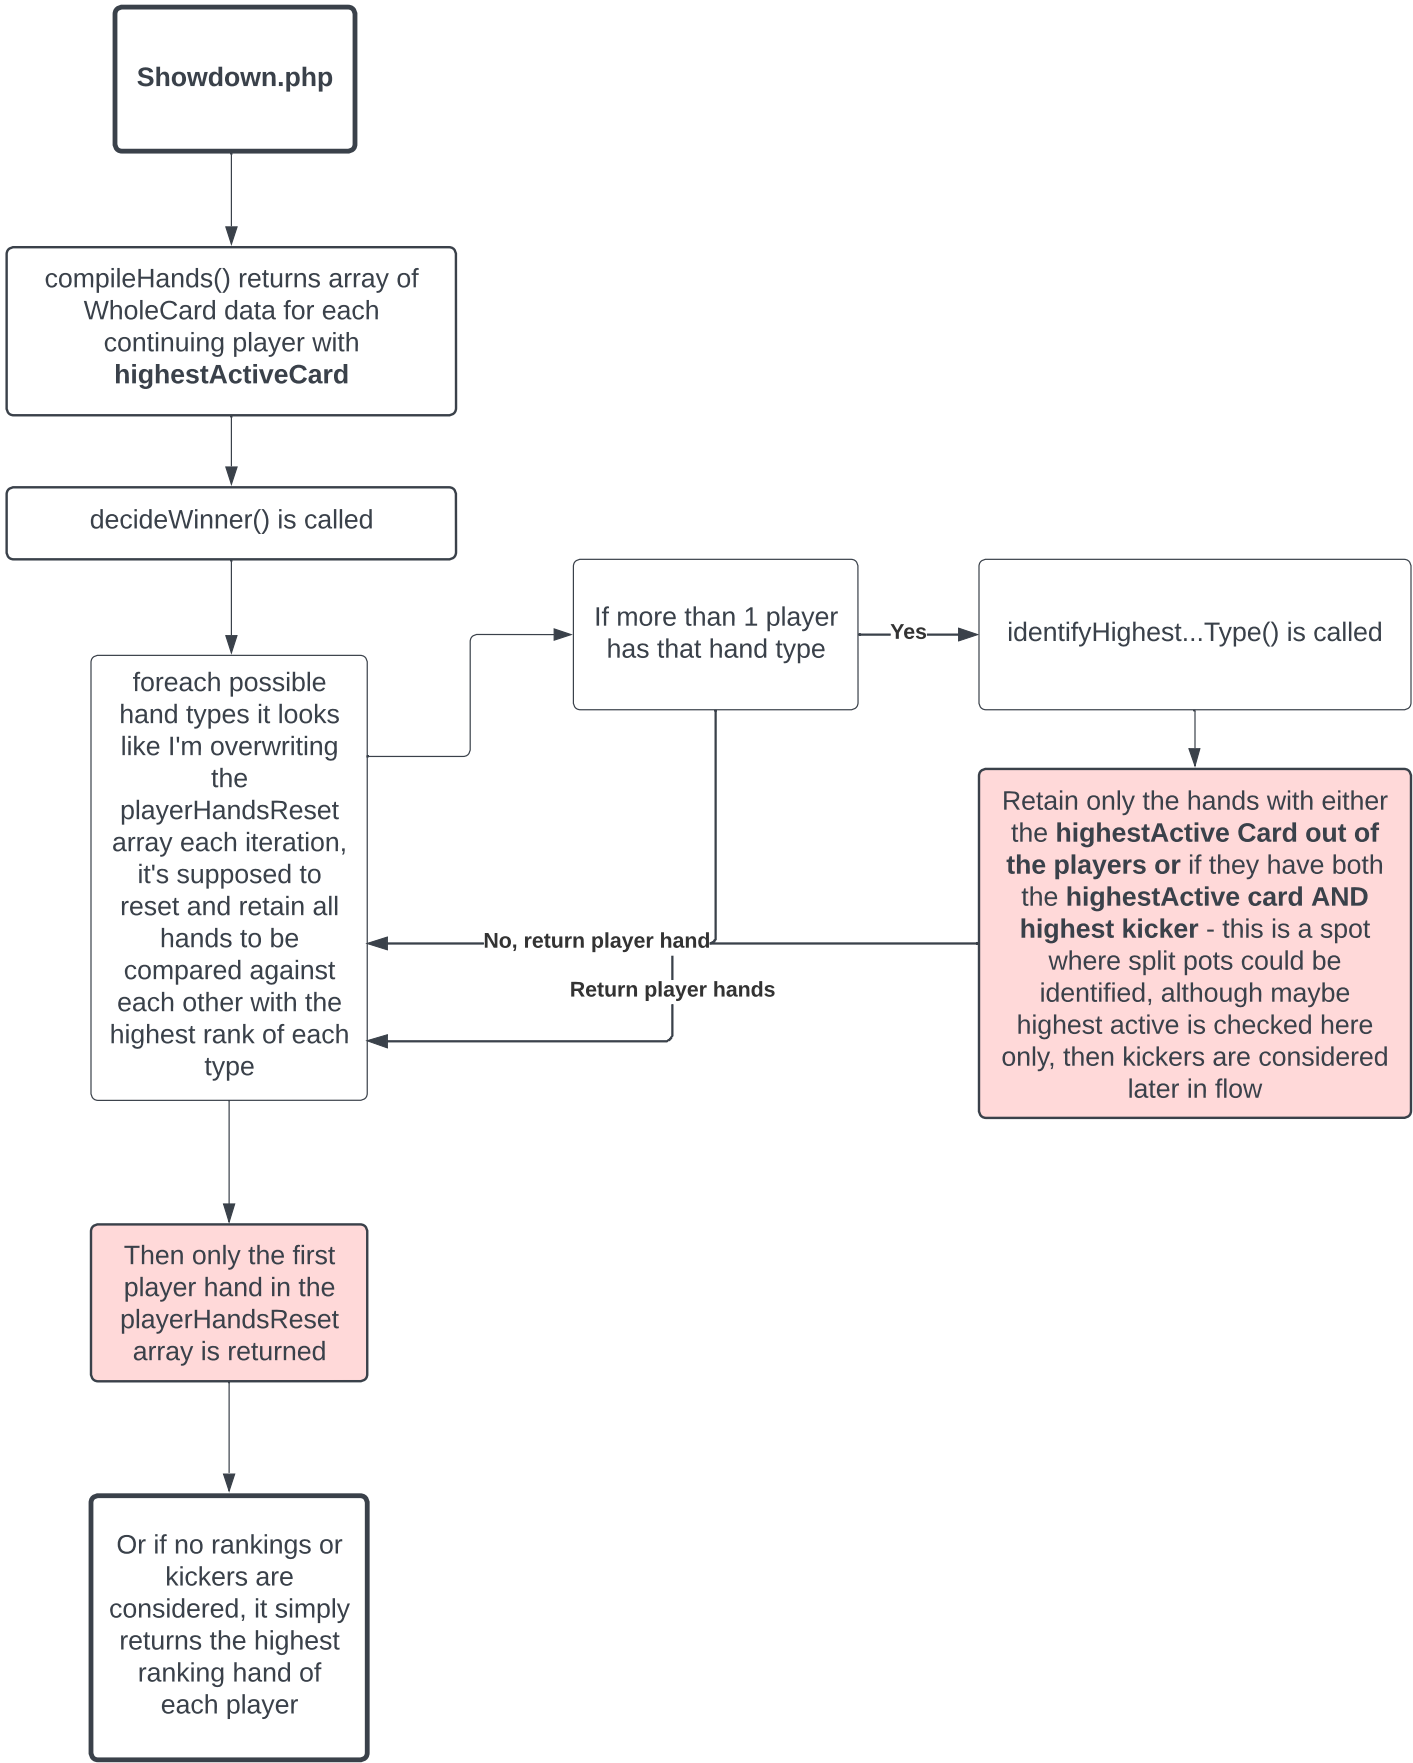

Requirement: update showdown to consider the kickers of the player's hands and return the highest ranking hand based on the kickers.

Note: split pots are also not handled yet, this can be addressed later as the front-end will need to catch multiple winners and display accordingly.

Key

- An existing step to be improved
- A solution/improvement step for the problem
- Undecided/TBC
